Delta tx® – Now with Under Seat Steering: The Relaxed Way to Enter the E-Trike Class

The comfortable **Delta tx® trike** makes safe cycling easier than ever before. That starts as soon as you get on—and becomes even easier in the *Under Seat Steering* version. The open design, the high seating position, and low step-through frame make it easy to get on and off. You'll enjoy an excellent overview of traffic, a secure position when stopping at traffic lights, and a completely free panoramic view on countryside trail rides.

A Matter of Posture: With the well-known *Delta tx®* featuring an *Above Seat Steering*, you enjoy the benefits of a classic bike handlebar with all controls clearly in view. The new optional *Under Seat Steering* makes riding the *Delta tx®* even more relaxing. If you'd like to enhance the comfort of this ultra-relaxed hand and arm position, we're happy to equip your trike with *Handrests*. You can also adjust the *Under Seat Steering* to suit your personal preferences—it's adjustable in both width and angle. Simply release the quick clamps beneath the seat.

The key to the *Delta tx®*'s safe and smooth ride is its comfortably suspended frame. The rear shock can be individually adjusted to accommodate rider weight and payload up to 320 lbs. The low positioning of the motor, battery, and rear cargo platform ensures confident road handling and excellent rollover stability.

Top class: The *Delta tx®* is lightweight in every aspect. With its sturdy aluminum frame, the lightest version weighs just 78 lbs including motor and battery. Your lightweight *Delta tx®* excels in the premium league of motorized tricycles!

Your *Delta tx®* provides full support in every situation. It always comes equipped with an electric motor. It is a *Class 1 E-Trike* with assist up to 20 mph. Four motor systems with different power profiles are available, all featuring a push assist up to 4 mph. You can also pair any of the motors with a fully automatic shifting system. Just pedal in your own pace—your trike automatically selects the right gear for you!

Want to learn more about the *Delta tx®* and the wide range of options offered by our modular system? Your authorized dealer will be happy to advise you!

In addition to its relaxed hand position, the *Delta tx®* with *Under Seat Steering* offers even more advantages. Both the left and right handlebar sections can be folded away independently, making it much easier for riders with limited mobility to get on and off the trike.

Prefer classic bicycle handlebars? Then simply choose the *Delta tx®* with *Above Seat Steering*. In this version, you will also enjoy the benefits of our comfortable e-chopper: excellent tipping stability, outstanding visibility, and a phenomenally relaxed riding experience!

Cycling fun on three wheels

Delta tx® – great ride, small package

In just a few minutes, you can split the *Delta tx*® trike into three compact parts. Achieving this maximum mobility requires only a minimum of tools—just a single Allen wrench.

Super fat, Super Moto-X e-bike tires from SCHWALBE—provides excellent ride comfort and strong grip, even on rough terrain.

Thanks to the adjustable seating systems, you can quickly find your ideal riding position. With the *ErgoMesh Premium* seat, you can even adjust the angle of the backrest and seat base independently. For transport, it can be folded completely flat.

The sturdy rear platform of your *Delta tx*® easily handles large amounts of cargo. The rack is rated for loads up to 55 lbs. The included basket measures 19 x 12.8" internally. Remove it, and you can easily fit a crate of beverages onto the carrier.

Powerful disc brakes: The *Delta tx*® comes equipped with hydraulic disc brakes. Instead of separate systems for the rear wheels, you also have the option of a coupled brake.
