New from HP VELOTECHNIK at the Eurobike trade fair (4 to 7 September): Trike packing

Anyone who takes a trip – likes to take a lot with them: HP VELOTECHNIK now equips its trikes with suitable accessories. Pictures: HP VELOTECHNIK

Just pack it in and go out

HP VELOTECHNIK optimizes the trike to a vehicle for those who want to travel far with a lot of comfort or have to accommodate a lot flexibly

FRIEDRICHSHAFEN. Do you know Bike Packing? Here comes Trike Packing: With an offensive in the accessories sector, the recumbent bike manufacturer HP VELOTECHNIK is setting an exclamation mark in terms of functionality and comfort. Slogan: More luggage – everything under control! The *Universal Mount* for digital handheld devices, the *Side Bag Mount* as well as the *Top Load* luggage carrier for high-quality suspension trikes with a large rear wheel significantly expand the spectrum of previous possibilities. The new accessories can be seen at the Eurobike trade fair in Friedrichshafen (4 to 7 September), at the booth of HP VELOTECHNIK, FO 103 in Foyer East.

The history of the recumbent bike is also one of travelling, in short: 100 kilometres of cycling – yet arriving relaxed and having seen everything on the way. Anyone who travels like this does not hesitate to take long trips and wants to attach the appropriate amount of luggage. In such cases the extremely stable trikes show their strengths: With the right attachments, they become true pack mules. However, as Managing Director Paul Hollants explains: "There are still far too few accessories on the market that fit easily on special bikes such as those from HP VELOTECHNIK. However, feedback from our customers tells us exactly what they want for even more comfort and functionality. That's why we've now expanded our range of accessories." With the *Universal Mount*, you can attach a wide variety of digital

handheld devices such as mobile phones or GPS directly and practically to the typical trike handlebar, a so-called under seat steering. They remain perfectly in the field of vision as well as in a favourable position for easy reach. The same applies to the *Side Bag Mount*: As in a luxury deckchair, all possible smaller parts can be placed close to the handle (see separate press release). Finally, the *Top Load* luggage carrier provides for the first time a loading option above a full-suspension, smooth-running 26-inch rear wheel, to be found on the *Scorpion fs 26*. The common bicycle baskets fit on this platform, but other – bulky – loads of up to ten kilograms can also ride well suspended. Additional luggage can be stowed as before in additional side pockets, such as the well-known ORTLIEB *Backrollers*.

The new trike-packing accessories from HP VELOTECHNIK will be available in specialist shops from November. The *Universal Mount* is available for 36.90 €, the *Top Load* luggage rack costs 109 € and the *Side Bag Mount* 119 € (RRP). Further information: www.hpvelotechnik.com or 0 61 92 - 97 99 20.
